

The **AluLock** is available exclusively for Alunet customers, providing top security accessories or doors in one easy-to-order kit.

The **ultimate security kit** combines a euro profile cylinder as standard, with the option to upgrade to the Ultion 3 star barrel, with the Brisant Sweet Handle and an exclusively designed Duplex Double Hook Lock.

ALULOCK

ALULOCK LOCK, KEEP & HANDLE

The **Ultion 3 star barrel*** provides double the sacrificial protection, made from materials **25% denser** than iron and with twice the number of pins than the average lock available on the market (including an antipick pin) and **20-point drill protection** as standard.

If attacked, the barrel enters '**lockdown mode**', meaning the lock is practically impossible to penetrate without heavy and noisy power tools. Ultion ensures security and durability for years to come.

ULTION STAYS LOCKED

DUPLEX DOUBLE-HOOK LOCK

The **Duplex Double Hook Lock** has been designed by UK-based Ingenious' highly experienced and dynamic design team, providing a **6-point locking system** instead of 3-hook for additional security. It comes with a dual follower to allow twin spindle function, which prevents unauthorised entry when the lock is in a latched position. Extremely robust with effortless operation, ideal for any modern, security conscious home.

The safe and stylish **Sweet Handle** is impressively durable, carrying multiple coatings of brass and nickel ensuring robust performance against the elements, with Brisant offering a **10 year direct to homeowner anti-corrosion guarantee** for peace of mind. The sleek curved design is not only pleasing to the eye, but is an impressive security feature - stopping gripping tools designed to snap off handles during break ins. Available in a range of colours, including black, white, grey, chrome and stainless steel. Gold and rose gold also available.

SWEET HANDLE
